CAREER SUMMARY

- 9+ years in automotive engineering across consulting and client-side roles: 4 years as a client-facing consultant at AVL (7 projects, 6 OEMs, ~₹5.3 Cr project value), delivered on or ahead of schedule
- 3 years leading digital transformation and engineering productivity at Tata Motors: 110-engineer department, ₹65L+ annual savings, ₹272 Cr business case for sensor virtualization
- Builds technology-, data- and AI-driven business cases and secures senior-leadership buy-in to fund and commercialize them

CORE CAPABILITIES

Consulting: Client Advisory & Negotiation | Pre-Sales & Estimation | CXO Stakeholder Management | Team Mentoring | Budgeting

Strategy: R&D Digital Transformation | Technology Roadmaps | Business Case & Value Realization | Structured Problem-Solving (5-Why, Fishbone, Pareto, Histogram, FMEA)

Data, AI & Tools: Data Analytics & Power BI | AI/GenAI (RAG, ML, n8n Agents) | Python | SQL | Excel | SAP PP/MM, MES-ERP Concepts

PROFESSIONAL EXPERIENCE

9 YEARS 6 MONTHS

Tata Motors Ltd. | Senior Manager - Mechatronics & Development

Feb 2023 - Mar 2026

Digital Engineering & AI Enablement

- Won **Tata Innfuzo 2025** among 4,200+ ideas (42 Tata companies), pitched to Group Chairman N Chandrasekaran, with a ₹272 Cr business case (₹2,100/vehicle saved) by replacing a physical sensor on the Yodha vehicle with an ML model (Python) on a Raspberry Pi; patent filed
- Delivered ₹65L+ annual savings (~16% of spend, finance-validated) and ~4% productivity gain (quality-validated) by leading the digital-validation transformation of a 110-engineer department (10-15% less physical testing)
- Cut regulatory-analysis effort by ~7% (engineering hours saved) by rolling out a **RAG-based** AI assistant for the 600-engineer engine cluster to search Indian automotive regulatory standards (AIS)
- Improved helmet-detection accuracy from ~78% to ~91% on one Pune assembly line by conceiving and validating an AI safety pilot
- Built **Power BI** dashboards on live IoT/telematics data across ~500 fleet vehicles (0.7L-5.3L), flagging faults up to a duty cycle early, an early step toward predictive maintenance

Portfolio & Technology Governance

- Grew Tata Motors' pilot-innovation budget from ~₹1 Cr to ₹3.5 Cr/year across 10-12 projects (~10 suppliers, 200+ stakeholders) via ERP/SAP-based procurement and BOM planning, partner selection (RFIs and RFQs), and senior-management approval
- Drove 2 of 4 technology programs to production through stage-gated governance: a new exhaust-filter material (~2% fuel-efficiency gain, less energy to heat) and the ML-based sensor-virtualization work (Tata Innfuzo 2025 winner)
- Built a next-generation heavy-duty engine business case projecting a 4.2% simulated fuel-economy gain by leading the engine-side Technical CFT, studying efficiency-improvement methodologies and benchmarking global players Volvo, Scania and Weichai
- Drove multiple technology recommendations to commercialization by representing Tata's engine function annually at ERC Tech Day and briefing the AVP-level cluster head regularly

Engineering Productivity & Capability Building

- Generated 60+ lower-cost ideas by leading 3 value-engineering (VAVE) workshops for light- and heavy-duty commercial engines
- Trained 900+ engineers on virtual testing, digital twins and applied ML via seminars and workshops, delivering a ~10% competency gain across a 120-engineer function

Escorts Kubota Ltd. | Manager - Engine Design & Testing

Mar 2022 - Jan 2023

Value Engineering & Cost Reduction

- Cut material cost by ₹2,250 per engine on a 105 HP engine, replacing a hardware component with software at zero recurring cost
- Improved fuel efficiency by 2.5% through engine calibration and value engineering, validated on standard off-highway test cycles

Team & Program Leadership

- Delivered regulatory roadmaps across 4 engine platforms by leading an 8-member cross-functional team and 5-6 suppliers

AVL Technical Centre | Assistant Manager - Calibration

Jan 2018 - Jan 2022

Client Consulting & Business Development

- Generated ₹1.27 Cr in revenue (2 programs: truck, pickup) during COVID by pitching a truck OEM's leadership to remove a costly emission-control part (~2% fuel-efficiency gain), then negotiating scope, price and timelines
- Delivered ~₹5.3 Cr in project value across 7 projects for 6 OEM clients (Graz-led team, on-site stints) by owning the client relationship: scoping, fortnightly reporting, leadership reviews and formal sign-off; mentored 8 engineers

Program Delivery

- Led an 18-month heavy-duty truck engine (BS VI) program in 14 months, securing **ARAI-level certification**, and led the pickup program too, building client rapport through monthly reviews
- Delivered **all 7 AVL programs** on or ahead of schedule, within AVL calibration guidelines and at par quality, e.g., a passenger-car program in 7 months vs 10 planned (30% ahead) while learning calibration on the job; earned an individual **€5,000** award from AVL's Austria HQ

Pre-Sales & Reusable Tools

- Powered all 7 client programs via proposals, quotations, executive decks, budgeting hours, negotiating suppliers and SAP resource-booking
- Built reusable analysis and simulation templates (Excel, digital-twin tools) that auto-generate charts and executive-ready output from raw data, adopted org-wide to speed up analysis and reporting

Escorts Agri Machinery | Assistant Manager - Engine Design & Testing

Jul 2016 - Jan 2018

Quality & Reliability

- Cut recurring field failures by 50% by driving structured root-cause analysis, improving component and supplier quality
- Guided fixes across 5 engine platforms through parts-level analysis and 2,000-hour durability tests

Operational Excellence

- Raised utilization of 8 engine test beds from 70% to 81% in 4 months through 5S, TQM and preventive maintenance

EDUCATION & CERTIFICATIONS

Qualification	Institute	Year	Score / Remarks
IPMX – Intl. Programme in Mgmt for Executives	IIM Lucknow	2026-27	In progress
PG Program, Data Science & Business Analytics	Great Lakes Executive Learning	2020-21	85% Top 20%
B.Tech, Mechanical Engineering	Vellore Institute of Technology, Chennai	2012-16	8.55/10 Top 15%

Certifications: Lean Six Sigma Green Belt - KPMG (2026) | Certified Scrum Product Owner - Scrum Alliance (2026)

ACADEMIC & ANALYTICS PROJECTS

- Placed **Top 8 among 3,600+ teams** at Sun Pharma-sponsored Trilytics 2026, merging ~10 datasets into a 724-district attractiveness index
- Built a personal AI planner (ChatGPT, n8n, Gmail, Sheets, Telegram), improving execution effectiveness by ~25%
- Built a customer-churn model on 11,260 account records, benchmarking ML models to identify retention drivers
- Reached the **finals among 1,000+ participants** at IIM Indore's Prabodhan Ace the Case, scaling a D2C brand from ₹72 Cr to ~₹225 Cr

LEADERSHIP, INNOVATION & DISTINCTIONS

- Organized **Shubharambh** (cultural) and **Udyam** (business conclave, ~40 speakers) with a 4-member IPMX team, pitching sponsors and handling budget and vendor negotiations to raise ₹10L in sponsorship
- Filed **3 patent applications** as a named inventor, each built around a customer pain point (tire theft, costly DPF removal for cleaning, software-virtualizing an expensive sensor)
- Published **4 research papers** and presented at the AVL Simulation Conference and SAVE Conference
- Founded **Speak Studio**, a 12-session program, and via the HR CFT anchored 4+ Tata Motors events (Town Hall 2023, All Hands 2024) and moderated leadership panels
- Reached the final 5 of Tata Imagineering (2023), pitching an emissions-reduction concept to the CTO
- Captained a 30-member VIT team to **National Runner-Up** at BAJA Student India 2016, raising ~₹2L in sponsorship
